

# Closing the window of opportunity for germs

CUTS CLEANING TIME BY UP TO **33%**

STERI-7 XTRA High Level Surface Disinfectant Cleaner with Reactive Barrier Technology hygienically cleans practically any surface or material, eradicating bacteria, spores, fungi, yeasts and viruses up to 99.9999%.

What makes STERI-7 XTRA High Level Surface Disinfectant Cleaner with Reactive Barrier Technology your ideal disinfecting and cleaning solution is that it can keep treated areas contamination free between cleaning cycles. This is because it has the ability to go on working once dried, something no other disinfectant is proven to do.

The result is round the clock Biosecurity, with no window of opportunity for germs to re-establish themselves.

## KILLS BACTERIA & MYCOBACTERIA:

MRSA  
Salmonella  
E. coli  
TB (mycobacterium)  
P. aeruginosa  
E. hirae  
Proteus vulgaris

## KILLS SPORES:

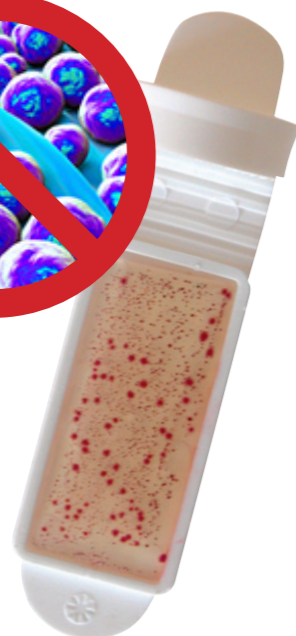

Clostridium difficile  
Bacillus subtilis  
Bacillus cereus

## KILLS VIRUSES:

Hepatitis c  
Influenza A H1N1  
SARS  
Norovirus

## KILLS FUNGI & YEASTS:

Aspergillus niger  
Candida albicans

**CONTAMINATED**  
A contact slide that has been applied to a working surface. The slide clearly shows the presence of contamination.

**AFTER 5 MINUTES**  
The same surface is retested with a new slide, 5 minutes after STERI-7 XTRA has been applied. No trace of contamination remains.

**AFTER 24 HOURS**  
The same surface is retested the following day. Despite pathogens having been clinically reintroduced, again no trace remains.

## A BREAKTHROUGH IN THE FIGHT AGAINST INFECTION

Wherever we go, whatever we do, there are harmful germs all around us. We are at risk from common bacteria like E. coli and Salmonella, and from viruses like Norovirus and Influenza. In our hospitals, 'superbugs' such as MRSA and Clostridium Difficile are responsible for thousands of patient deaths each year. And there are new threats emerging too, like Avian Flu and SARS.

The most effective way to protect yourself and those around you from these threats is by thorough cleaning and disinfection. And the best disinfectant cleaner you can use is STERI-7 XTRA.

## SIMPLE AND CONVENIENT TO USE

**Rigorously TESTED**

**Independently PROVEN**

**And now used across the world**

STERI-7 XTRA is available in handy spray bottles and wipes as well as concentrates for dilution in water. STERI-7 XTRA is also very safe to use, non-corrosive and considered not harmful to the environment when used at manufacturers' instructions.

This means you don't have to change your cleaning protocols to use it – and you don't even need to rinse it after application!

Just replace the products you are currently using with STERI-7 XTRA and continue cleaning as usual.

**PROVEN**

## DOUBLE PROTECTION AGAINST CONTAMINATION

STERI-7 XTRA makes any surface as hygienic as a surgical instrument. This is because of an innovation called RBT (Reactive Barrier Technology), which allows STERI-7 XTRA to provide double protection against germs.

When applied to a worktop, floor, wall, door, sink or even a fabric, the biocide in STERI-7 XTRA kills germs up to 99.9999%. At the same time a reactive barrier is created which reactivates in the presence of moisture to ensure that germs subsequently introduced to will also be killed.

## 7 CLEAR BENEFITS

Kills bacteria, spores and viruses FAST

Kills pathogens up to 99.9999% at the point of application

Continues to eradicate germs between cleans

Cuts costs and cleaning time

Classed as non harmful to the environment

Works in a wide temperature range of 4°C to 55°C

Your cleaning protocol can remain the same

## ALLOWANCE FOR HUMAN ERROR

STERI-7's Reactive Barrier Technology means that if an area is missed by cleaners, as will happen from time to time, the barrier will provide protection until that area is cleaned the next day or day after that.

*" Since we started using STERI-7 in our Care Home there has been a noticeable drop in the number of stomach upsets suffered by our residents. It's proving a real help in reducing cross contamination. "*

Emma Miller, Teignmouth House care home, Devon.

**PROVEN**

## ABILITY TO CUT CLEANING TIME BY UP TO 33%

Because STERI-7 XTRA keeps working when dry, areas that you might normally need to fully clean several times over the course of a week or even a day will remain sterile with significantly fewer, or quicker, cleans. To quantify the time savings STERI-7 XTRA offers, we asked i-Clean™ (a Cleaning Management System ) to calculate the time cost per square metre of using STERI-7 XTRA instead of normal cleaners.

Cleaner and safer with STERI-7 XTRA

**i-CLEAN® FOUND THAT:**

Using STERI-7 XTRA can lead to time savings of up to 33% according to the area cleaned.

With manpower costs accounting for around 75% of cleaning costs, the resultant cost savings are significant.

The largest savings are found in areas that represent the greatest threat to hygiene as they have to be cleaned the most frequently.

As an example, an average village hospital with an annual cleaning requirement of 3,600 hours would be able to cut this to around 2,500 hours simply by using STERI-7 XTRA.

## WHERE IS STERI-7 XTRA USED?

Hospitals	Catering	Physiotherapy units
Prisons	Laboratories	Airlines
Care homes	Gyms	Military barracks
Schools	Public lavatories	Offices
Hotels	Dental practices	
Poultry farms	Vets
